

# Why Lean Six Sigma

The goal of implementing Lean Six Sigma is to drive sustainable change throughout an organization by improving quality, cost and delivery. Lean Six Sigma follows the DMAIC process and uses objective data and statistical tools to drive positive, quantifiable, and material changes. These tools help streamline process flow, eliminate waste, improve quality and ensure the end result is consistent and repeatable.

## 3 Reasons to Implement Lean Six Sigma

1

Financial Distress

2

Hospital Turnaround

3

Improve Patient Care
